

EdShare (Education Sharing) is ECY-EL BINUS SCHOOL Serpong's way in realizing the school vision of "contributing to local communities." This year, a free Math workshop was conducted for 24 Math teachers from six neighboring schools. It was held in SDN Lengkong Wetan 01, Serpong on Friday, 23<sup>rd</sup> February 2018.

The chosen topic was "The Use of Hands-on Activities to Support Problem Solving Skills of the Students". Teaching about Math concepts using Concrete-Pictorial-Approach (CPA) was shared to help strengthen students' skills in solving Math problems, especially word problems. The facilitators comprised of twelve Elementary Math teachers.

At the end of the programme, the participants shared their feedback. One of the feedback was, "Today's session was so much fun and it gave us more knowledge on teaching Math, even if the time was not enough. We hope that we will have this kind of workshop again in the future." The Elementary Teachers were grateful for the opportunity to share their knowledge with teachers from other schools. It was rewarding to see their thirst for learning as well as also rewarding to be able to quench their thirst. This is what ECY – EL BINUS SCHOOL Serpong works hard for, to be able to help others one step at a time.
